

BLOOD TEMPERATURE CONTROL NEEDLE

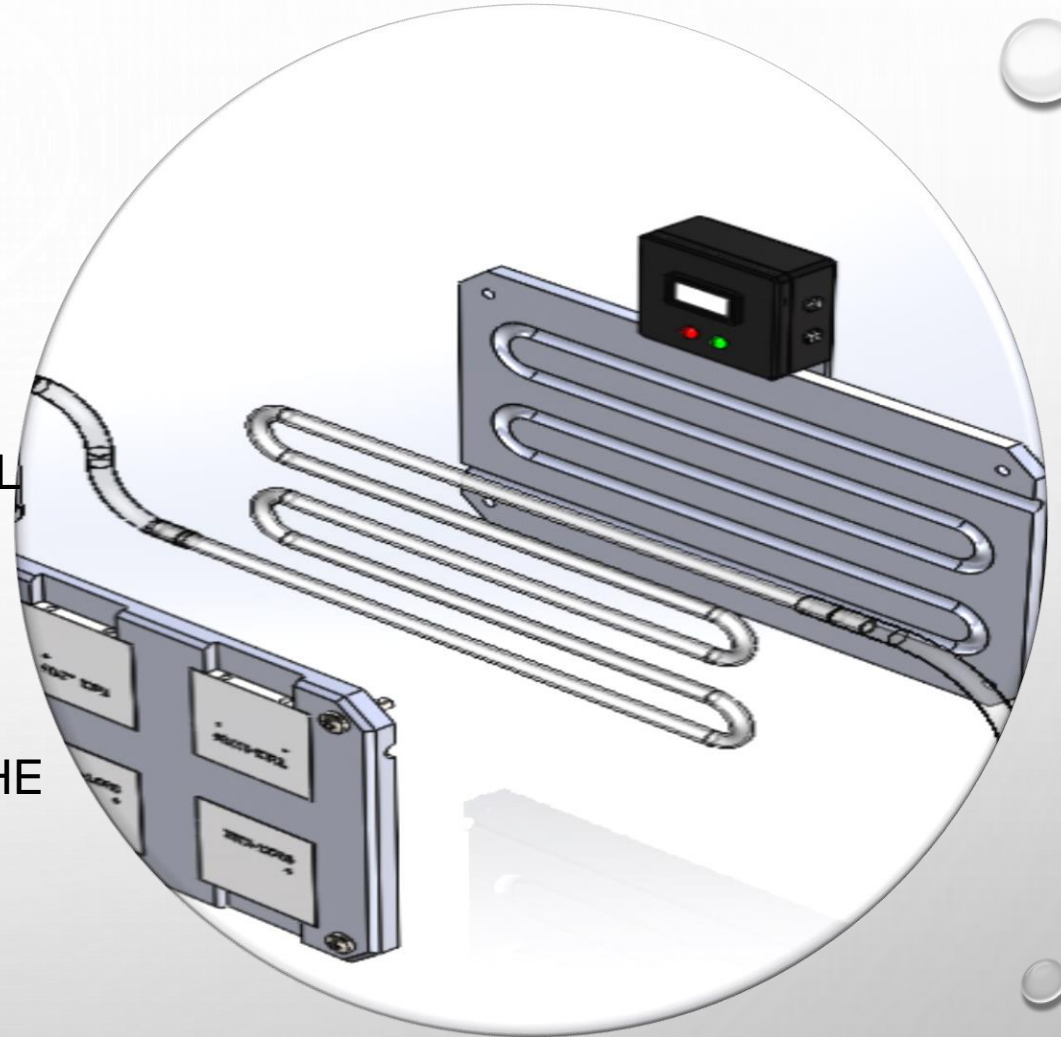

Intelligence is when oxygen stores and then release if it only releases it cannot be stored.
Intelligence is blood storages between two temperatures, Lower to store the intelligence and higher to release it. Only only way too balance between these two temperature is with this device.

BLOOD TEMPERATURE CONTROL NEEDLE

BLOOD TEMPERATURE CONTROL NEEDLE WILL TAKE CONTROL OF BODY TEMPERATURE AND BLOOD CIRCULATION.

THIS DEVICE CAN RISE OR DROP BODY TEMPERATURE INSTANTLY BY MANIPULATES THE TEMPERATURE OF THE BLOOD.

Benefits of using this device

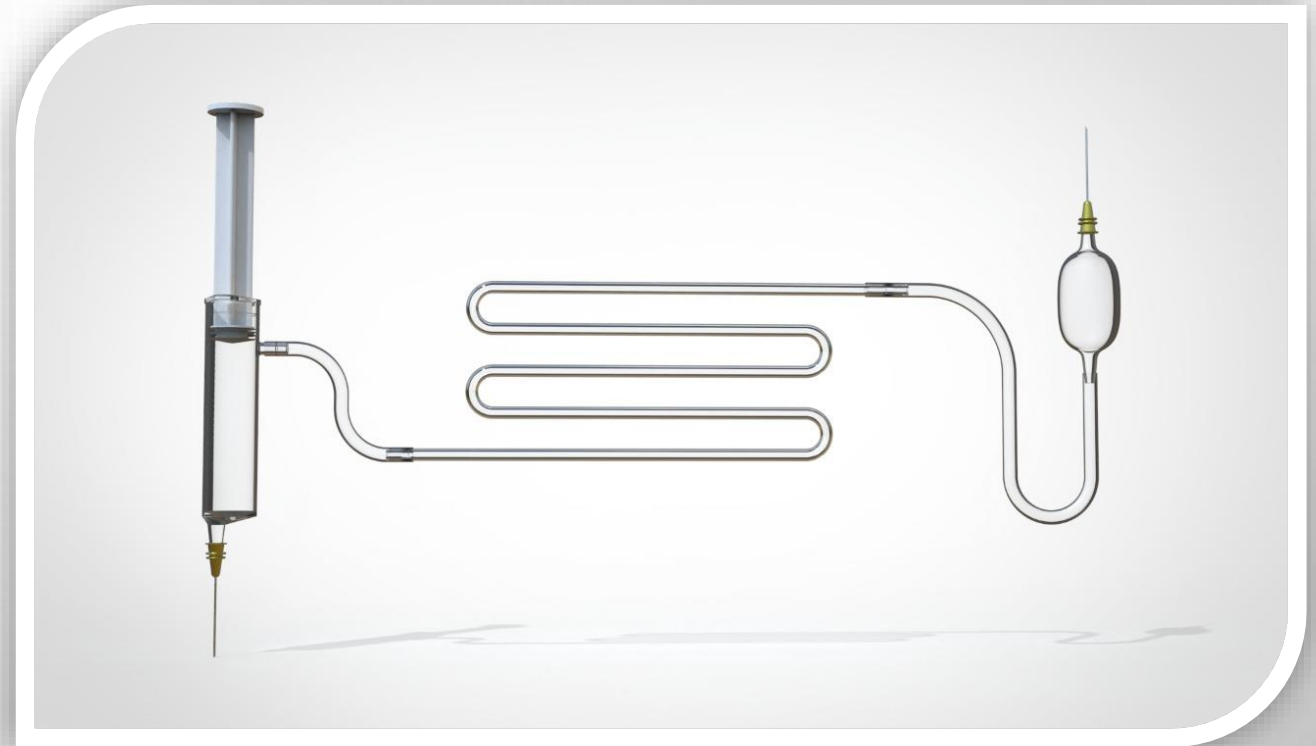

This device can be use in wide field of medical like for the treatment of following diseases.

- Fever
- Stroke
- Cancer
- Asthma
- Ms
- Arthritis

And, also we can use in case of

- Heat flashes
- Learning problems
- Strengthens the heart

It allows user to stay warm when it's cold outside and cool down when it's hot outside.

Working process of the device

Human Blood had pressure and when we inject the needle into the body blood flow out of the body through the small needle to the initial tube where blood is stored. Once blood reaches certain level then it follows through the connecting pipes and reaches to the Peltier plate. Based on Peltier effects on Peltier plate the temperature of blood can be manipulate as per requirement as to make it higher temperature or to make it lower temperature. After the temperature effects blood further follows through the pipe to the injection syringe and due to suction it fills the syringe and ready for inject to the human body.
